

## 2. CADDY® PYRAMID

### CADDY® PYRAMID

- Dramatically reduces installation time by replacing slow, heavy and labor-intensive methods for supporting pipes, conduits, cable tray and equipment
- CADDY PYRAMID® supports a wide range of concentrated loads from 110 N to 2700 N. Easily increase load capacity by combining similar supports (two CADDY PYRAMID 50 = 440 N)
- Supports multiple runs of pipe and conduit on roofs and below raised floors
- Protects the roof membrane while absorbing shock and vibration, but will not absorb water
- CADDY PYRAMID has been load tested to a 5-to-1 safety factor
- Metal cover protects against weather and other environmental conditions, such as damage caused by birds
- Features a standard electro-/pre-galvanized finish for corrosion protection
- Multilayer corrosion protection (P22) coating available for environments where a higher degree of corrosion resistance is desired, such as areas where hot-dipped galvanized finishes are used today

### CADDY® PYRAMID 25
